

Recommended Use:

As a dietary supplement, adults take eight to 16 tablets daily with sufficient water.

Net Weight: 100g (400mg × 250 tablets) per container

Supplement Facts (100g)

• Calories	290kcal
• Protein	40.5g
• Fat	2.2g
• Carbohydrate	35.2g
• Sodium	4.57g
• Mucopolysaccharides/Protein	55.3g
• Fructo-oligosaccharides	8.1g
• Collagen Peptides	3.0g

Ingredients:

Bovine cartilage extract (New Zealand), Fructo-oligosaccharide, Whey powder, Glucose, Collagen peptide, Bifidobacterium powder processed food (Potato starch, Bifidobacterium powder, Processed oil or fat), Calcinated bone calcium, Trehalose, Food perfumes, Lecithin, Guar gum, (Partially included: Cow milk, Gelatin, Soy beans)

Be a centenarian.

Centenarian is a person who has reached the age of 100 years in healthy conditions.

It will help you supplement mucopolysaccharides, which generally decrease in the body as we age, and live healthy and energetically.

For your healthy and energetic life

What is Mucopolysaccharide?

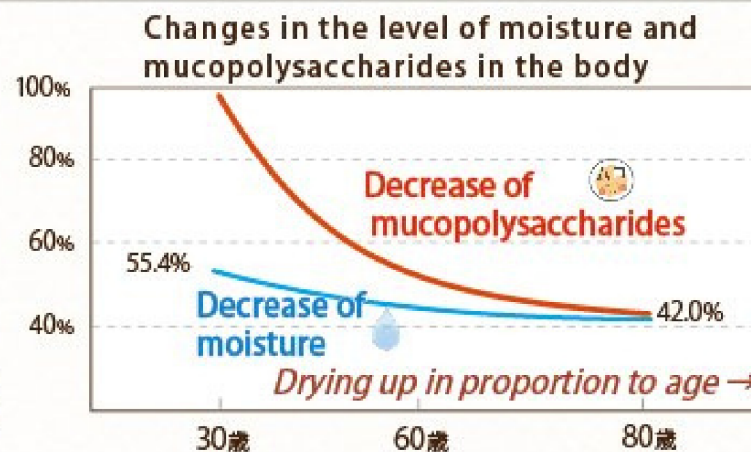

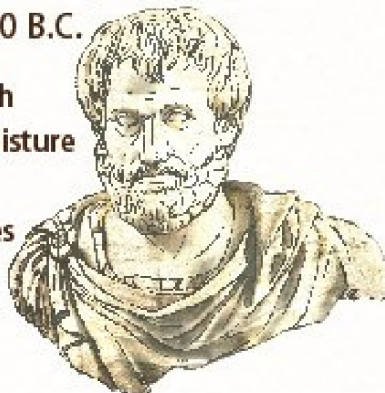

Mucopolysaccharides are long chains of carbohydrates (sugar) molecules, such as chondroitin and hyaluronic acid, that are found throughout the body, often in mucus and in fluid around the joints. These are essential in keeping epidermal and dermal cells healthy.

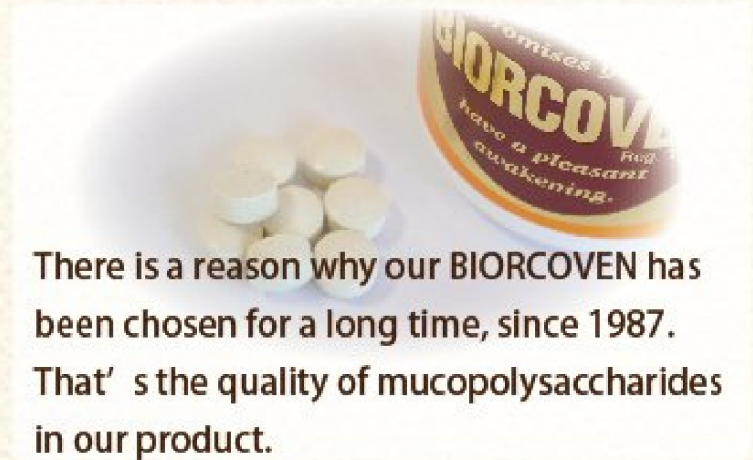

「The process of aging is tied to the gradual drying up of the internal moisture necessary for life.」
by Aristotle, 340 B.C.

Aging is just like the process of a fresh apple shriveling. Why do we lose moisture as we age?

That's because mucopolysaccharides in the body start decreasing as we hit the mid-20s.

Reference: Torii, S. Bashey, R.L. Nakao, K. Biochim. Biophys. Acta 1101, 285

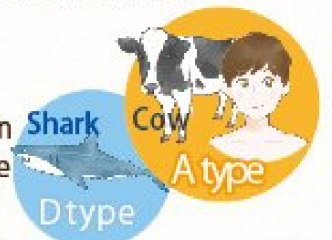

There is a reason why our BIORCOVEN has been chosen for a long time, since 1987. That's the quality of mucopolysaccharides in our product.

Point

01

Use of mucopolysaccharides similar to the human's:

We chose the mucopolysaccharides, whose chondroitin, the main constituent element, has the same sulfate type as that of humans for the best effects.

Point

02

The state of naturally occurring substances:

In the product, we keep chondroitin and hyaluronic acid as naturally occurring substances, and ensure the safety and effects.

Point

03

High quality:

We use mucopolysaccharides, whose ingredient is the extracts of cartilaginous tissue of cattle from New Zealand. New Zealand is well-known for its world-class quality of grass-fed, free-range beef.
